

Name _____

Pythons and Ladders

Pick a value for x between 0-10 to start with. Start at the top-left corner of the maze, and follow the commands in each square, keeping track of x as you go. If you end up on the dragon, skull, snake, or bomb, pick a new value of x and try again! Determine which values of x lead to the gold!

$x =$

Use this scratch area to keep track of x .
